

Kerim Akmurzayev

iOS Developer

Istanbul, Türkiye · kerimxak@icloud.com · +90 536 787 50 69 · Telegram @kerimxak

kerimxak.xyz · github.com/kerimxak · linkedin.com/in/kerimxak

iOS developer who builds and ships complete products — SwiftUI front ends backed by services I deploy and run myself. Recently built **Eczane**, a live SwiftUI + MapKit app that finds Turkey's on-duty pharmacies, powered by a FastAPI backend I host on a Linux VPS. Comfortable owning a feature end to end — from UI to API to deployment. Trilingual (English C2, Turkish C2, Russian native).

TECHNICAL SKILLS

Languages: Swift, Python, C/C++, JavaScript

iOS: SwiftUI, MapKit, CoreLocation, SwiftData, URLSession, Swift Concurrency (async/await), Xcode, TestFlight

Backend & Infrastructure: FastAPI, REST APIs, SQLite, Linux, SSH, Cloudflare (Tunnel / DNS / Pages), Git & GitHub

Other: Fusion 360 / 3D printing, ROS2, computer vision (YOLO), embedded (ESP32 / RP2040)

PROJECTS

Eczane — iOS app & backend

2026

- Live SwiftUI app that maps Turkey's rotating on-duty (nöbetçi) pharmacies, sorted by distance with one-tap navigate and call.
- Built custom MapKit annotations, bottom-sheet detents, and live turn-by-turn route drawing with MKDirections; distance sorting via CoreLocation.
- Designed and deployed the backend end to end: a FastAPI + SQLite caching service on a Linux VPS, served over HTTPS through a Cloudflare Tunnel.

100 Days of SwiftUI — app series

2025 – 2026

- Designed and shipped a series of finished SwiftUI apps: a Pomodoro timer (released v1.0), an expense tracker, and MoneySplit (bill splitting).
- Practiced state management, persistence with SwiftData, haptics, and the realities of preparing apps for release.

Autonomous Elevator-Navigating Robot — capstone

2025 – 2026

- Robot that locates and rides elevators between floors: ROS2 for control and YOLO on a Raspberry Pi 5 for button and door detection.

Self-Hosted Network Infrastructure — personal

2025 – Present

- Run Linux VPS nodes serving family abroad, managing the panel, DNS, and reliable direct delivery in a heavily censored region. Hands-on Linux, SSH, and networking operations.

EXPERIENCE

Logistics Coordinator — Radanite Global Lojistik, Istanbul

2025 – 2026

- Coordinated international road-freight shipments and customs documentation across multiple countries; multilingual (TR / RU / EN) communication with agents and clients.

Sales Coordinator — Boutique Auto Haus, USA (Remote)

2021 – 2023

- International sales coordination and multilingual customer communication for a US automotive company.

Game Localization Specialist — River Game (Remote)

2019 – 2021

- Localized the strategy game Top War into Turkish and Russian — in-game text translation, cultural adaptation, and QA within a multilingual team.

VENTURES & ACTIVITIES

Korin Labs — Founder, Istanbul

2026 – Present

- 3D-printed designer lamp brand run end to end: CAD in Fusion 360, production on a Bambu Lab A1, an online storefront, and paid social campaigns.

Istanbul Club — Founder & President, Bahçeşehir University

2024 – 2025

- Founded and led a university club helping students from other cities and countries discover Istanbul.

Snake on ESP32 — hardware project

2025

- Built a playable Snake game on an ESP32 microcontroller with an ST7735 display — C/C++ firmware, input handling, and rendering on constrained hardware.

EDUCATION

B.Sc. Computer Engineering — Bahçeşehir University (BAU), Istanbul

2022 – 2026
